South Florida Regional Planning Council
Hollywood, Florida

Exercise Summary

The South Florida LEPC held its annual tabletop exercise on September 20, 2018 at the new offices of the South Florida Regional Planning Council in Hollywood. The subject matter for 2018 was Anhydrous Ammonia, its characteristics, properties and transport. Two scenarios were discussed: a Cold Storage Facility Incident and a Transport Catastrophic Release.

More than 25 subject matter experts (SME) were present for the event, including many Committee members. Represented were fire rescue and hazmat, hospitals and health, environmental services, emergency management and safety, as well as many facility representatives.

It was found that additional coordination and collaboration would be beneficial in major incidents taking place at or near the Countyline and requiring significant first responder and hazmat response from multiple jurisdictions and agencies.
