SECTION I
AMENDMENT REPORT
BROWARD COUNTY LAND USE PLAN
PROPOSED AMENDMENT PC 20-1
(WILTON MANORS)

RECOMMENDATIONS/ACTIONS  DATE

I.  Planning Council Staff Transmittal Recommendation  December 3, 2019

As the proposed amendment has not yet demonstrated compliance with BrowardNext - Broward County Land Use Plan (BCLUP) Policy 2.14.9, Planning Council staff would generally recommend denial. However, due to the unanticipated delay regarding the review of the applicant’s proposed transportation methodology, Planning Council staff recommends approval subject to compliance with BCLUP Policy 2.14.9, prior to a second Planning Council public hearing.

II.  Planning Council Transmittal Recommendation  December 12, 2019

Planning Council recommended approval of the proposed amendment subject to compliance with BCLUP Policy 2.14.9 prior to a second Planning Council public hearing. (Vote of the board; Unanimous; 12-0: Blackwelder, Breslau, Brunson, Castillo, Fernandez, Gomez, Graham, Hardin, Maxey, Parness, Rosenof and Stermer)

III.  County Commission Transmittal Recommendation  January 28, 2020

Approval. (Note: Due to a mathematical error, the alternative traffic analysis should have shown a decrease in the number of net p.m. peak hour trips, not an increase. Therefore, the amendment is in compliance with all BrowardNext – Broward County Land Use Plan policies, including Policy 2.14.9. In such a case, Planning Council staff would have recommended approval of the subject amendment with no further conditions.)

IV.  Planning Council Staff Final Recommendation  February 18, 2020

As noted in the January 28, 2020 County Commission Transmittal Recommendation, Planning Council staff finds the proposed amendment generally consistent with the policies of the BrowardNext – Broward County Land Use Plan, including Policy 2.14.9, and recommends approval. Further, in accordance with Chapter 163, Florida Statutes, the County Commission has transmitted the proposed amendment to all State review agencies. The 30-day review period expires no later than March 4, 2020. Consistent with the Administrative Rules Document: BrowardNext, if an objection or comment on adverse impacts to important State resources or facilities is issued, an additional Planning Council public hearing will be scheduled.
IV. **Planning Council Staff Final Recommendation (continued)**  
**February 18, 2020**

In addition, if the Broward County Land Use Plan amendment is adopted by the County Commission, this action by the Planning Council shall be considered the “conditional” recertification of the municipal land use plan amendment which directly correlates to the referenced Broward County Land Use Plan amendment. The recertification will not be deemed effective until such time as the Planning Council Executive Director and Attorney determine that the municipality has fulfilled all application requirements for recertification of local land use plans, as outlined in the *Administrative Rules Document: BrowardNext*. The Planning Council Executive Director will issue a written letter of effectiveness to the municipality upon satisfaction of the same.

V. **Planning Council Final Recommendation**  
**February 27, 2020**

Approval per Planning Council final recommendation. (Vote of the board; Unanimous: 18-0; Blattner, Breslau, Brunson, Castillo, DiGiorgio, Fernandez, Gomez, Good, Graham, Hardin, Maxey, Parness, Railey, Rich, Rosenof, Ryan, Williams and Stermer)

VI. **Summary of State of Florida Review Agency Comments**  
**March 4, 2020**

The State of Florida Review Agencies issued no comments or objections regarding the proposed amendment.

VII. **County Commission Final Action**  
**April 21, 2020**

Approved per Planning Council final recommendation.

EXPLANATION OF TRANSPORTATION TERMINOLOGY

Year 2040: Long Range Regional Transportation Network

I.T.E.: Institute of Transportation Engineers Trip Generation Manual

Capacity: Capacity at Level of Service D in thousands of vehicles at p.m. peak hour

P.M. Peak Hour: Traffic in thousands of vehicles per peak hour (i.e. one hour measured between 4:00 and 6:00 p.m.)

Annual Average Daily Traffic (A.A.D.T.): The volume passing a point or segment of a roadway in both directions for one year divided by the number of days in the year.¹

Significance Threshold: Corresponding to additional p.m. peak hour trips at three-percent (3%) or more of such capacity of a regional transportation link at the long-range planning horizon per BrowardNext - Broward County Land Use Plan Policy 2.14.9.

LOS: Level of Service² (LOS D is a policy of the Broward County Board of County Commissioners)

A LOS A describes primarily free-flow operations at average travel speeds, usually about 90 percent of the free-flow speed for the given street class. Vehicles are completely unimpeded in their ability to maneuver within the traffic stream. Control delay at signalized intersections is minimal.

B LOS B describes reasonable unimpeded operations at average travel speeds, usually about 70 percent of the free-flow speed for the street class. The ability to maneuver within the traffic stream is only slightly restricted, and control delays at signalized intersections are not significant.

C LOS C describes stable operations; however, ability to maneuver and change lanes in midblock locations may be more restricted than at LOS B, and longer queues, adverse signal coordination, or both may contribute to lower average travel speeds of about 50 percent of the free-flow speed for the street class.

D LOS D borders on a range in which small increases in flow may cause substantial increases in delay and decreases in travel speed. LOS D may be due to adverse signal progression, inappropriate signal timing, high volumes, or a combination of these factors. Average travel speeds are about 40 percent of free-flow speed.

E LOS E is characterized by significant delays and average travel speeds of 33 percent or less of the free-flow speed. Such operations are caused by a combination of adverse progression, high signal density, high volumes, extensive delays at critical intersections, and inappropriate signal timing.

F LOS F is characterized by urban street flow at extremely low speeds, typically one-third to one-fourth of the free-flow speed. Intersection congestion is likely at critical signalized locations, with high delays, high volumes, and extensive queuing.
