Subject: Proposed development

This development will have a negative impact on the environment, quality of life and reduction in real estate values. As well as long term commercial development.

We may not see clearly the long term impact of this but, our children and their children will suffer.

There is plenty of older buildings that are of date and have very poor function use, out dated building code requirements and could be raised.

Save your environment, vote against this development. There are many other areas that can be made available and will not have a negative impact on our society and quality of life.

Thank you
Terry Sutton

Subject: Proposed Development in Homestead

Dear South Florida Regional Planning Council,

I reside in Islamorada and I am very concerned about the potential damage to the environment that we all love and depend on. I am worried that our limited water supply will run short. I am concerned about Everglades restoration, negative impacts to our current quality of life and too much traffic to handle Hurricane evacuations safely. there ae numerous extra-jurisdictional impacts too.

Please deny this project and this zoning change.

Kind regards,
Deborah Willits

VOTE NO!

You will have all the reasons, in writing before you tomorrow as well as all the speakers.

Please remember that you were elected to represent the people, not make the developers rich and destroy what's left of South Dade and by extension the Upper Keys.

Do not allow ANY encroachment beyond the UBD Line. Once developers get a foothold beyond the UBD Line, the Everglades and Florida Bay are doomed. 50 years in the future it will be solid concrete from Miami to Naples.

Thank you,
Eddie Wightman

Subject: No to more commercial development in Homestead

I am a resident of Monroe County, and I am extremely concerned about the proposed development in Homestead.

Development such as this will be detrimental to both the supply and quality of water feeding the Everglades. Additionally, major development such as this poses an extreme danger to the wildlife in that area. All of which are things people are elected to preserve, not demolish.

The dollars are tempting, I'm sure, but dollars can't fix a broken environment and dirty water supply. Dollars don't bring back birds and other natural wildlife that should have never left.

Chasing dollars only affords for great mistakes; it can't undo the harm.

We know this here in Monroe because we couldn't stop development in time. Our ecosystem is suffering due to choices made decades ago.

You have a chance here to put your foot down (collectively) and make a difference, for generations to come.

Please take this chance to be the names that future generations look to as a sources of preservation.

Please take this chance to stand up for the remainder of our precious environment.

Please say NO to this development.

Humbly,
Tatiana Madden
Monroe County, FL
