

*Freebee*

FREE. ON-DEMAND.  
100% ELECTRIC TRANSPORTATION.

# Freebee

Freebee is the future of mobility, focusing on enhancing the public transportation sector providing first-and-last-mile connectivity. We provide FREE, on-demand, 100% electric transportation as part of the public transit network of many municipalities, colleges/universities, and private entities such as corporate parks, construction industry, and hotels/resorts. Our end-to-end approach to mobility can easily adapt to support the smart growth plans of any community while providing a localized experience that speaks to the heart of the people we serve.

Freebee's platform combines the functionality of both Uber and Yelp, where users can digitally explore their community by recommended category and then request free transportation directly to the local destination of their choice.

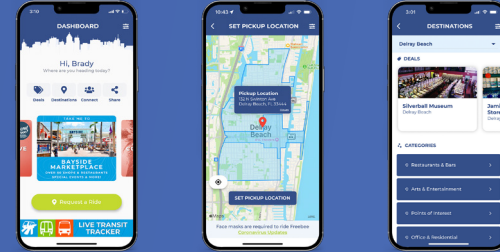

Simply put, we are connecting people with the community around them while aiding economic development and advocating for a greener earth.

Launched in 2012, Freebee currently operates a fleet of over 150+ electric vehicles, serving over 30+ communities within Florida and Virginia.
