

TEDDY LHOUTELLIER

Director of Sustainability, University of Miami

Teddy Lhoutellier is the current Sustainability Director for the University of Miami. Renewable Energy, Sustainability and Environmental Science are his passion. He started at the U in 2014, implementing the University's first comprehensive Sustainability Action Plan, after receiving a Silver ranking through the Sustainability Tracking and Assessment Rating System program. Today, the University of Miami is a STARS Gold University. The office of sustainability's team he manages help initiate, monitor, track, promote, and advertise sustainability initiatives across divisions, schools and campuses. Green U, as the office is commonly known, is spreading sustainable development values everyday among UM community members.

Teddy graduated Magna Cum Laude from Florida International University, holding a MS degree in Environmental Studies - Energy Policy. He also holds a LEED Green Associate, a LEED AP Operation and Maintenance, and a Project Management Professional certificate. He worked for four years as an Environmental Science and Environmental Policy Instructor at Florida International University, and was the Outreach Coordinator for a Miami based Solar Panel Distributor. He's an active member of various environmental organizations in Miami Dade.
